

CTRL/Project

The engineering firm's management software for profitable projects!

CTRL is the only software manufacturer to offer a truly integrated management solution.

Powerful and easy to use!

CTRL redefines flexibility and user-friendliness with a new generation of software that are at the forefront of information technologies and operational management.

- Real time profitability analysis per project with drilldown.
- Rigorous management of works in progress.
- Management of subcontracting per project and supplier.
- Batch billing, and fixed rate or progressive billing
- Decentralization of time sheets per employee and via the Internet!
- Management of accounts receivable and payable per project and project manager.
- Complete payroll with integral CCQ report.
- Possibility of centralizing project costs in a multicompany setting.
- Intercompany and interdivision management.
- Integrated imagery for complete management of numerical documents per project (plans, quotations, photos, etc.).
- Transparent integration with most popular office tools (MS-Word™, MS-Excel™, WinFax™).
